Behavioral KPI Tracking App & AI implementation Bots

AI-augmented management, training & coaching

Accelerate capability building with AI technologies tailored to role- and context- specific business needs, delivering measurable impact on practices and performance.

Outcomes:

◆ Objective reaching (management, training, or coaching) guided by AI bots that train on real professional scenarios.

◆ Clearer, faster, fact-anchored decisions.

◆ Action better focused on the drivers of effectiveness.

◆ Smoother interactions and stronger operational rituals (prioritization, action-plan tracking, etc.)

◆ Impact measurement: before/after dashboards (self + 360-review) and anchoring through action KPIs aligned with objectives.

AI Bots:

ERGA (Coach)

Acknowledge difficulties to act on them more effectively

UPOLEPSIS (Trainer)

Turn negative into facts - not judgments - to manage them better

ORACLE (Consultant)

Instantly build the skills that are required

FOCUS (Consultant)

Intensify what is effective & satisfying

OPEN-VIEW (Consultant)

New perceptions, new responses

LOGOS (Trainer)

Free yourself from cognitive biases to serve your professional effectiveness
